Hydrographic Trends

UVS supported a combined Seminar/Workshop of the East Australian Region of the Australasian Hydrographic Society (AHS) where CTO Darren Burrowes, provided information on how robotics and automated systems were already changing the way that tasks such as hydrographic survey were completed in the ocean.

Technical Update - Hemisphere GPS - Fugro Satellite Corrections

Fugro Marinestar has ceased transmitting corrections signals to Hemisphere. Hemisphere is working on alternatives. For Teledyne Odom MB1 users with internal H320 boards, the work around is to input RTCM corrections from a stand-alone receiver that can accept Fugro signals.

Solar Installation at UVS Newcastle office

The UVS Newcastle office is now “powered by the sun” following the installation and commissioning of a 10kW roof top mounted solar photovoltaic array. The system will generate reliable electricity for over 25 years and provide clean energy for both UVS and society in general.

Events

ADCPs in Action in Australia Gold Coast, Queensland, 12 & 13 May 2015

Join us at Southport Yacht Club on the Gold Coast for the third ADCPs in Action in Australia - mark your calendar and Register Here for the premier ADCP event in Australia!

Highlights planned for the conference are:

- Comprehensive training sessions on ADCP theory
- Workshops and training on data analysis
- ADCP product demonstrations including the new RiverPro
- QAQC software training
- User presentations and “lessons – learned”
- Teledyne RESON & Odom on-water product demonstrations
- Sentinel V and Long Range data review
- GPS integration, compass calibration and system communications

Please help us to make ADCPs in Action in Australia in 2015 the best ever. [Complete our survey](#) to tell us what your preferences are so that we provide the most value for your time at the conference.

New Products & Services

StreamPro Service Certification

UVS has been officially sanctioned by Teledyne RD Instruments to inspect, maintain, calibrate and repair StreamPro ADCPs. Adding to the existing Teledyne Authorised Service Centre established by UVS & RD Instruments, this additional capability will benefit UVS customers working with ADCPs in water resources applications. The StreamPro is the ideal instrument for accurate measurements of water discharge in shallow stream applications from 15 to 200cm in depth. UVS supports sales and rentals of water resources products including StreamPro, RiverPro and RiverRay for measurements in shallow streams to deep rivers.

DL23 Subsea Datalogger with Acoustic Link

Real Time Results with High Accuracy Measurement and Recording

The DL23 Subsea Datalogger with Acoustic Link supports operations to prove the integrity of newly laid or repaired pipeline on the seafloor where there is a need to provide high accuracy (0.1%) measurements of temperature & pressure of a charged pipeline. The DL23 provides results in real time using an acoustic link to transmit data and enable control.

Training Survey

The year is now in full swing with everyone back in the office from the summer break. Maybe it is time to plan your training requirements for 2015?

At UVS we are in constant contact with our overseas-based OEMs and we want to organise their visits to Australia to maximise the benefit for UVS customers. Please take a moment to consider your training needs in 2015 and let us know what you need and when the best dates are.

Winner of the January survey was Lorry Hughes of Griffith University – congratulations Lorry!

[Complete our survey](#) to tell us what your training needs are for 2015.

TAKE THE SURVEY

Please complete your contact details if you would like to go in the draw for a prize of UVS 40-Year Anniversary Wine!
